*When we purchased TutorTrac in 2002 we had no idea as to just how powerful a tool TutorTrac was or how it would change the way we would do business. Now I can't imagine running our services without it. We use TutorTrac for scheduling, tracking, reporting, surveying, asssessing, documenting, and in many other creative ways. It is has aided in bringing a lot of credibility to our Academic Support Services by both students, faculty, and administration. TutorTrac is a huge reason for why we're able to serve over 8,000 students annually.*

General Information     Features     Specifications     Standard Reports     Test Request

**TutorTrac Basics:**
TutorTrac is a powerful and complete management software for learning, writing, reading, tutoring departments, and academic skills centers for traditional and athletic students. TutorTrac is completely web-based and may be installed at your college or university or hosted by Redrock Software Corporation. Connect your registrar, information technology department, tutoring and learning center directors, and other tutoring staff to provide a unified system to track registrations in courses, record visits to the tutoring and learning centers, and report on progress and grades earned in courses.

**Installation**
The TutorTrac installation is very simple. Insert the provided CD to your server or run the downloaded installation files on your server. TutorTrac can be installed on a Windows or Mac server.

**Hosted Solution**
TutorTrac may be a hosted solution for your college or university. When using the hosted version, you will work with Redrock Software Corporation to access and set up your TutorTrac server. Server and web hosting fees apply. Contact sales@go-redrock.com for more details.

**Capabilities**
TutorTrac can store full demographic information for more than 2 billion student records with registrations and visit histories, yet it contains quick and simple search options and reports. It is powerful enough to meet the needs of university tutoring and learning centers serving a student population in excess of 50,000 but it is flexible enough to monitor a small study skills lab.

**Compatibility**
TutorTrac can be installed on any Windows OS 2000 or newer and any Mac OS X server. As a completely web-based application, users can access and work with the system from any web browser in any operating system. TutorTrac can import data from other databases, including Banner, Peoplesoft, Datatel, SIS, and
