Discussion and Improvements Changes
Be sure to include the names of the instructors who discussed and analyzed this SLO data with you. If you discussed this during a department meeting, state that. You do not need to mention everyone's names.

An example from Biology:
I changed the assessment for this SLO this semester because the previous assessment was too challenging for the students and above the level of work that I was expecting them to do.

This assessment is a more direct measure of students' ability to come up with an experiment to test a hypothesis in a group activity. Overall, I am happy with the results, and the assignment is more of a teaching tool for them to learn how to approach scientific testing. I currently see no need to change this SLO at this time.

Daniel Gilison and Jia Sun were involved with this discussion.
