

21. How do I find out what classes to take to prepare for my major?

Universities must show the course requirements for each of the degrees they offer in their catalogs. A large selection of printed catalogs is available in the Transfer Center or you can access them online. You can also find a link to Advising Guides for Transfer in Specific Majors in the Transfer Center. These guides show the requirements for the most popular majors at universities with which IVC has articulation agreements. Last, some universities provide information about articulation by major at the web site <http://www.assist.org>. An IVC transfer counselor can help you make use of any of these resources.
